Subject: Notification of upcoming change in IP addresses of SLA monitoring system probe nodes

Dear Colleagues,

This message is to inform you about an upcoming change in the IP addresses of ICANN's Registry SLA monitoring probe nodes. This change will take place on 21 February 2017 at 00:00 UTC.

The following IP address(es) will be added:

148.163.220.38
2607:f740:1::190
176.58.90.227
2a00:dd80:3e::ad6
103.212.120.121
2400:5300:0:1A::5

The following IP address(es) will be removed:

103.13.242.58
2404:a700:0:1:225:90ff:fed0:7308

Please update your systems allowing access for the new IP address(es). This is required in order for the monitoring of your TLD(s) to work as described in Specification 10 of your Registry Agreement.

The published list of IP addresses at https://tld-monitor.icann.org/nodes.csv[tld-monitor.icann.org] has been updated, however, we are not using the monitoring from the new IP address(es) until the aforementioned time. The list of IP addresses is also available in JSON format at https://tld-monitor.icann.org/nodes.json[tld-monitor.icann.org].

Best Regards,

Technical Services and Registry Services Teams
Global Domains Division
