Subject: RE: ICANN Notice of Breach

Dear Jeff Zhai:

We examined the Whois records today for the domain names referenced in ICANN's letter of breach dated 30 September 2008 and we found that the domain names listed below were not placed on "client-hold" status, continue to reflect the Whois inaccuracies reported to ICANN and have not been removed from the zone file. As such, it appears that your registrar has not taken any action regarding these Whois inaccuracy claims. Beijing Innovative Linkage Technologies will remain in breach of Section 3.7.8 of the Registrar Accreditation Agreement and risk termination until reasonable steps to investigate and correct these Whois inaccuracies are taken and reported to ICANN.

As stated on ICANN's notice of breach, I would like to speak with you to develop an oversight plan to prevent the recurrence of this problem. I am available to meet with you via telephone on Thursday, 9 October 2008 at 23:30 UTC. You may reach me at the telephone number below.
