BY _____

1 I, Samantha Eisner, declare:

2 1. I am an associate with the law firm Jones Day, counsel of record for
3 plaintiff Internet Corporation for Assigned Names and Numbers ("ICANN") in this
4 action. I am admitted to practice before this Court. I submit this declaration in
5 support of ICANN's Report on Compliance with Injunction in Support of Further
6 Sanctions ("ICANN's Report") against defendants RegisterFly.Com, Inc. and
7 UnifiedNames, Inc. (collectively, "RegisterFly") and ICANN's Opposition to
8 Defendant's *Ex Parte* Application. I have personal knowledge of the facts set forth
9 in this declaration and am competent to testify if called as a witness.

10 2. The Court's May 25, 2007 Order Imposing Sanctions ("Sanctions
11 Order") gave RegisterFly forty-eight hours to comply with Paragraph 11 of the
12 Preliminary Injunction requiring RegisterFly to post a notice of consumers on its
13 website at <http://www.registerfly.com/>. Beginning on Sunday May 27, 2007,
14 ICANN, through its counsel, notified RegisterFly of its failure to comply with the
15 notice provision. First, on the afternoon of May 27, 2007, Jeffrey A. LeVee, a
16 partner with Jones Day and counsel of record for ICANN, sent Heather McCloskey
17 of Ervin Cohen & Jessup, LLP, counsel of record for RegisterFly, an email noting
18 RegisterFly's failure to post the required notice. On Tuesday, May 29, 2007, I sent
19 Ms. McCloskey a letter again noting RegisterFly's failure to post the required
20 notice on its home page (<http://www.registerfly.com/>), as well as the impropriety of
21 placement of the notice on the customer support page and the failure of RegisterFly
22 to post the notice in the top-third of the page. On that same day, Ms McCloskey
23 sent me a return letter explaining that a scripting error required RegisterFly to place
24 the notice on the bottom of the web page. Ms. McCloskey never addressed
25 ICANN's inquiries regarding the failure to place the notice on the RegisterFly
26 home page. A true and correct copy of Mr. LeVee's May 27, 2007 email to Ms.
27 McCloskey is attached hereto as Exhibit A. A true and correct copy of my May 29,
28

1 2007 letter to Ms. McCloskey is attached hereto as Exhibit B. A true and correct
2 copy of Ms. McCloskey's May 29 letter to me is attached hereto as Exhibit C.

3 3. As of June 4, 2007, the notice was finally posted on the home page of
4 RegisterFly's site, but the notice only appears on the bottom of the page.

5 4. On June 4, 2007, I sent an email to Ms. McCloskey informing her of
6 that the most recent privacy/proxy data submission from RegisterFly contained
7 records for approximately 2,700 domain names still masked with a proxy whois
8 identifier. I have not yet received a response or explanation. A true and correct
9 copy of my June 4, 2007 email to Ms. McCloskey addressing the proxy data issue
10 is attached hereto as Exhibit D.

11 5. On the morning of June 1, 2007, I sent an email to Ms. McCloskey
12 informing her that RegisterFly's May 31, 2007 data submission did not meet the
13 required .csv specification as required in Paragraph 3 of the Sanctions Order. I sent
14 this email at 11:28 a.m. PDT, approximately 5 hours prior to receiving service of
15 the Medina Declaration, which incorrectly states "this upload was in the requested
16 .csv format." Ms. McCloskey then requested further explanation as to what was
17 required to meet RFC 4180 specifications. At 1:00 p.m. on June 1, 2007 – the last
18 day for compliance with Sanctions Order – Ms. McCloskey requested a phone call
19 with ICANN's technical staff to discuss this issue. ICANN made its staff available
20 for this last-minute request, and the parties came to an apparent understanding
21 regarding how RegisterFly is to comply with the written specification of RFC 4180.
22 In my initial email to Ms. McCloskey addressing the .csv formatting issue, I
23 informed Ms. McCloskey that the MD5 hash that ICANN received from
24 RegisterFly did not match ICANN's MD5 hash. A true and correct copy of the
25 June 1, 2007 email chain between Ms. McCloskey and me discussing the .csv issue
26 and the MD5 hash is attached hereto as Exhibit E.

27 6. On at least two occasions, I have specifically told Ms. McCloskey that
28 the MD5 hash is *not* for encryption and/or RegisterFly does *not* require anything

1 from ICANN to generate such a hash over the file. In a May 23, 2007 phone call, I
2 explained the purpose of each of the technical specifications within the Preliminary
3 Injunction. On May 24, 2007, I sent Ms. McCloskey an email again explaining the
4 purpose of the MD5 hash. A true and correct copy of my May 24, 2007 email to
5 Ms. McCloskey is attached hereto as Exhibit F.

6 7. On May 31, 2007, RegisterFly purported to make the registration Data
7 under Section 3.4.3 available to ICANN for inspection. On June 1, 2007 ICANN
8 requested that RegisterFly provide a copy of the audit materials for review, and
9 RegisterFly had a single DVD sent via messenger to ICANN. ICANN reported to
10 me that it was not able to open the disk to view the data. I later requested that Ms.
11 McCloskey confirm the functionality of the disk and testing before it was submitted
12 to ICANN. Ms. McCloskey did not provide that confirmation. A true and correct
13 copy of the email chain between Ms. McCloskey and me discussing the audit disk
14 is attached hereto as Exhibit G.

15 8. On June 4, 2007, RegisterFly elected to provide ICANN with an
16 alternative form of transmission of the audit file, through an internet download link.
17 The first link that RegisterFly submitted was expired. In addition, the linked file
18 had the same name as RegisterFly's data submission file, though the audit provision
19 entitles ICANN to far more information than the data sets RegisterFly was required
20 to submit under Paragraphs 1-3 of the PI. When I requested clarification of the
21 contents of the file and notified Ms. McCloskey of the expired link, Ms. McCloskey
22 responded with a *new* internet download link. Ms. McCloskey indicated that this
23 new link should contain the additional information that ICANN is entitled to under
24 the audit provision. Attached hereto as Exhibit H is a true and correct copy of my
25 email chain with Ms. McCloskey addressing the first download link.

26 9. On June 5, 2007, I received an email from Ms. McCloskey confirming
27 that ICANN did not have the entirety of the Data it is entitled to under the audit
28

1 provisions. A true and correct copy of Ms. McCloskey June 5, 2007 email is
2 attached hereto as Exhibit I.

3 10. Even if RegisterFly's file submissions had been complete to satisfy
4 Section 3.4.3 of the audit requirement in the RAA, RegisterFly, would still *not* be in
5 compliance with Paragraph 8 of the PI. Paragraph 8 entitles ICANN to far more
6 than RegisterFly's limited interpretation of books and records, which RegisterFly
7 interprets to be mean *only* the registration Data. The broad use of "books and
8 records" entitles ICANN to also review RegisterFly's financial data, but
9 RegisterFly refuses to make that available to ICANN.

10 11. RegisterFly has *never* provided ICANN with the identification of the
11 physical locations of where the data is stored.

12 12. On June 1, 2007, ICANN officially terminated the Registrar
13 Accreditation Agreement with RegisterFly pursuant to Paragraph 14 of the PI. A
14 true and correct copy of the Notice of Termination is attached hereto as Exhibit J.

15 13. On May 23, 2007, Ms. McCloskey asked me if ICANN would
16 stipulate to removing the Notice to Consumer provisions from the PI. On that same
17 day, Ms. McCloskey told me that RegisterFly it intended to oppose the entry of the
18 Permanent Injunction on the basis of the mootness of the Notice provision.
19 RegisterFly did not include the argument in its May 24 filings.

20 14. ICANN initiated this lawsuit against RegisterFly on March 29, 2007.
21 RegisterFly initiated the AAA Arbitration against ICANN on March 28, 2007 –
22 *after* ICANN provided RegisterFly with notice that it intended to file suit and seek
23 a temporary restraining order. After receipt of notice, and prior to initiating the
24 arbitration, RegisterFly attempted to persuade ICANN to not file suit, and promised
25 to provide ICANN with the requested data. Based on earlier promises of data
26 submissions, ICANN had held off on filing suit in this matter, only to find the data
27 submission insufficient. ICANN determined that it must proceed with suit and
28

1 could not take the risk of allowing RegisterFly to *continue* to frustrate ICANN's
2 attempts to protect RegisterFly's customers.

3 15. While RegisterFly tells this Court that it started out as a reseller, it
4 does not tell this Court about the fact that RegisterFly encountered problems as a
5 reseller. ENom, a registrar that RegisterFly maintained a reseller relationship with,
6 was contacted by ICANN on more than one occasion relating to customer
7 complaints over RegisterFly. RegisterFly's track record as a reseller raises many of
8 the same concerns as the documented issues with RegisterFly as a registrar. Indeed,
9 one source of RegisterFly customer complaints to ICANN involved confusion over
10 RegisterFly's status as a reseller or registrar.

11 16. ICANN did not know that RegisterFly was intending to continue act as
12 a reseller until May 29, 2007. I learned of this fact in Ms. McCloskey's May 29,
13 2007 letter, attached hereto as Exhibit C.

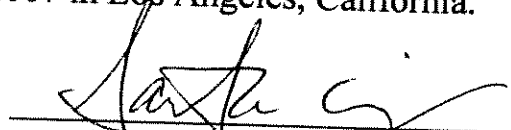

14 17. Notably, RegisterFly's description of its reseller activities still leave it
15 open to responsibilities such as the collection and maintenance of registration data
16 for the names registered through its reselling service, as well as customer service
17 responsibilities – the same actions that precipitated (in part) the instant suit and
18 termination.

19 18. ICANN's consumer protection goals in assuring a posting of Notice to
20 Consumers regarding termination are *even more essential* now that it has
21 confirmation that RegisterFly intends to remain active in the domain name
22 registration business as a reseller.

23 19. RegisterFly tells this Court that it has "removed all language on the
24 www.registerfly.com website that references [RegisterFly] as domain name
25 registrars." (App. at 1:19-20.) This could not be further from the truth. After I
26 received service of the Application on the afternoon of June 4, 2007, I was able to
27 locate no fewer than *ten* separate links from the registerfly.com page with
28 references to RegisterFly as a registrar – *including* the Uniform Domain Name

1 Dispute Resolution Policy incorporated as part of RegisterFly's Registration
2 Agreement. (See <https://registerfly.com/info/dispute.php> at ¶ 1 (referring to "us
3 (the registrar)"). Attached hereto as Exhibit K are various screenshots from
4 different links accessed through www.registerfly.com that I located on June 4, 2007
5 and June 5, 2007 after I received service of RegisterFly's Application.
6

7 This affidavit was signed on June 5, 2007 in Los Angeles, California.

Re: ICANN v. RegisterFly: Improper Notice Posting

Dear Heather:

This morning we again checked www.registerfly.com to see if your client properly posted the notice to consumers as required in Paragraph 11 of the Preliminary Injunction. The notice to consumers is not there. Your client still has not complied with the Court's Order. I did find a notice to consumers posted on the Customer Support page (<http://www.registerfly.com/help/>), but that is not sufficient; the Court order explicitly states that the notice is to be posted at "<http://www.registerfly.com/>." Further, even if the Preliminary Injunction allowed your client to post this notice only on its Customer Support page – which it does not – the notice is still not correctly placed. The notice must be in the top third of the web page, not where it currently appears. Again, ICANN will continue to record your client's failure to comply with the Court's orders.

In visiting your client's website, I was also surprised to see that despite your representations at the hearing on Friday that your client was no longer acting as a registrar, as well as the announcement of the completion of the transfer of names to GoDaddy, the RegisterFly website still appears to: 1) solicit domain name registrations; and 2) allow consumers to go through the registration process. Like Jeff LeVee attempted prior to the hearing last week, as of today at 10:30 a.m. PDT I was able to proceed through the domain name registration process on RegisterFly.com to the point of checkout. I did not actually attempt to complete the checkout process. This is unacceptable. Not only has your client elected to hide the notice to consumers that is intended to warn consumers of the potential risks of dealing with RegisterFly; your client still holds itself out as offering the very registration services you stated in Court that RegisterFly no longer offers.

Very truly yours,

Samantha Eisner

Re: ICANN v. RegisterFly

Dear Ms. Eisner:

I received your letter of earlier today and write in response thereto.

With respect to the placement of the notice, the placement at the bottom of the page is the only manner in which the webmaster could make the change within the timeframe provided. When the webmaster tried to put the notice at the top of the page, it rendered the page unusable, therefore it was placed at the bottom of the page. The scripting is being modified so that it can be placed at the top of the page.

With respect to your ability to purchase domain names on RegisterFly.com, RegisterFly does not, and does not intend to, function as a registrar. RegisterFly.com now functions only as a reseller of names and all registrations or transfers are done as a reseller and NOT as a registrar. This conduct does not require any ICANN accreditation.

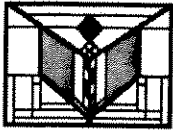

Please don't hesitate to let me know if there are any additional issues.

Very truly yours,

Heather L. McCloskey

Subject RegisterFly Privacy Data Submission Question

Dear Ms. McCloskey,

ICANN received RegisterFly's privacy data submission at approximately 5:00 p.m. on June 1, 2007. ICANN has been able to perform an initial review of the files, and is not able to confirm that it has all of the required data.

Could you please seek clarification on the following issues :

1. ICANN initially received a privacy related file from RegisterFly on May 24, 2007. That submission is 19MB large and contains 133240 lines. Given that each domain has four records associated with it, on separate lines, there were records for approximately 33,310 domains represented. The June 1, 2007 submission is over 6 times larger than the previous submission, with 132 MB and containing 808666 lines. This most recent record set represents approximately 202,166.5 domains with a whois proxy. Could you please provide an explanation as to the vast difference in size between the two submissions ?
2. There are approximately 11,186 lines of data, (or approximately 2,792 records), that still refer to ProtectFly within the June 1, 2007 Data submission. This means that RegisterFly is still producing data that is masked by the whois proxy and is therefore in violation of the Court's order. Based on this, ICANN is not able to state with any certainty that it has the entirety of the privacy -related data it is entitled to.

Thank you,

Samantha Eisner

Subject: RE: ICANN Audit of RegisterFly Books and additional data issues

Ms. McCloskey -

ICANN has confirmed that the data does not meet the specifications of RFC 4180. ICANN assures me that this is not a complicated specification to meet. In the event that your client is having difficulties meeting the specifications, they should - as the Preliminary Injunction states at Paragraph 7 - contact

EXHIBIT E
PAGE 11

ICANN to negotiate a workable file format. It is my understanding that they have never done this. As you know, during our communications, I have always suggested that the technical terms would be more appropriately discussed by the respective technical contacts of our clients, and ICANN has always been open to this direct communication. Finally, in response to your client's questions regarding the technical specifications that were forwarded earlier this week, I again offered to coordinate a meeting with the ICANN technical staff to explain the details of what the specifications require, particularly in light of the noted confusion in the questions. I have never been requested to coordinate such a meeting.

At this time, the explanation you are requesting is best handled through direct discussion with ICANN's technical department. If your client would like to discuss this with ICANN today, I can coordinate a call. Any "delay" this may cause your client in complying with the letter of the Court's orders is your client's responsibility; ICANN has been available for over a month to discuss how your client may meet these specifications.

Subject RE: ICANN Audit of RegisterFly Books and additional data
issues

Ms. Eisner,

I will look into these issues right away. I am not aware that the transmittal does not meet the .csv specifications you expected. I would request that you explain this, since the Order simply requires "a consistent /csv file format, in accordance with RFC 4180" which it is my understanding the file format meets. If there is some other specification you are expecting, please inform me of that specifically so that we can try to straighten this out.

Thank you,

Subject: Re: ICANN Audit of RegisterFly Books and additional data issues

Ms. McCloskey,

Though we obviously have a disagreement regarding the scope of ICANN's audit rights, ICANN would like to obtain a copy of the registration data you have available. Please have a copy of the data transmitted to my office today. If you require anything to prepare the copy for ICANN, please let me know. In addition, if there are file transmittal issues, please contact me to arrange for courier service to pick up the copy from your office.

In addition, I have been informed of a few data transmittal issues that ICANN requires clarification on. First, ICANN received a data transmission from your client yesterday (May 31, 2007). An MD5 hash accompanied the file, but it did not match the hash generated by ICANN upon receipt. ICANN ran its MD5 hash twice, and both times generated the following hash: 2d9455f694dd269d3da3cb429c887c13 Copy of regfly_escrow_may30.zip. The RegisterFly hash was as follows: HMAC-MD5 -> Copy of regfly_escrow_may30.zip ae9282ce1a8ffa46c1cbeb1b41834c9a. I am still working with ICANN's technical department to determine what may be necessary to correct this issue, but I wanted to bring it to your attention in the event that your client has some ideas for a fix. As you may be aware, the data transmission did not meet the .csv specifications as required in the Court's orders.

Finally, I have been informed that this morning ICANN received 2 files from your client:

EXHIBIT E
PAGE 13

downloads601.zip
HMAC-[ALL HASHers] (Base16)-0000601.txt

ICANN is unable to unzip the .zip file (it is potentially corrupted), and cannot determine what these files are. Please provide a description of these files and their contents, and request your client to send a new zip file.

Thank you,

 Subject RE: RegisterFly: Data submission questions

Ms. McCloskey -

I write to clarify the issues you've raised in points 1. and 2. below.

First, there were actually *seven* data transmissions sent by your client without utilizing the SFTP server. The very first SFTP transfer occurred on April 13, 2007 - just two days after the service of the Supplemental Briefing on the TRO that I forwarded yesterday.

As to point 2., ICANN does not have any record of conversation with your client regarding the MD5 algorithm, or of any request made for a "key" to perform the MD5 algorithm in March. Further, ICANN itself raised the need for the MD5 hash file in April (not March), in response to concerns over the integrity of the (unsecured) files it was receiving from your client. The timing of your client's alleged request to ICANN is not supported by the actual progression of events over this issue.

More importantly, no key is required for your client to create the MD5 hash file. The hash file is created independently by the transmitting party. The receiving party performs its own independent hash over the transmitted file and compares it to the transmitter's hash to confirm the integrity of the file. Keys are required only for encryption, and the MD5 hash algorithm is not an encrypted file.

 Subject RE: RegisterFly: Data submission questions

Some of the issues we discussed today:

1. You were right about the SFTP issue. The very first transmission was not sent via SFTP, but all since then have been.
2. The algorithm issue -- this is the one where we need a key. Kevin asked for a key in March and ICANN never got back to him.
3. CSV format -- We didn't know this was an issue. This is the same format we used to transfer to Godaddy and they have had no issues. ICANN has never informed Kevin that this was an issue -- unless it was in some of your papers and he missed it.

Looks like we are making some progress. Please let me know if you have any questions.

Subject RegisterFly: Data submission questions

Dear Ms. McCloskey:

ICANN informs me that today it received three data files from your client, and we are hoping your client can provide some clarification as to what was sent.

First, the data file entitled "regfly_escrow_may23.zip", though titled similarly to the prior weekly data transmissions, is 30 megabytes smaller than the average submissions previously made. Can your client

EXHIBIT F
PAGE 17

please explain why this is? In addition, ICANN is not able to unzip this file; could you please request that your client re-submit to ICANN?

Second, ICANN received two files it had never seen before: "private1.txt" and "private.csv". There was no indication as to what these files represent or what format they are in, nor was there any description or legend included with the files. Could you please request your client to provide clarification as the purpose of these two files, and provide ICANN with descriptions or legends as available?

Thank you for your assistance with this.

Sam

 Subject RE: Messengering Data

Ms. McCloskey,

Here's ICANN's reply as to the type of machine they are using:

"The machine that we're using is under a year old and has a DVD-RW which means that it can write DVDs (what I'm guessing she means by DVR.. though DVR means Digital Video Recorder... ie, TiVo) as well as read all DVD format types. There's been no problem with other data discs that I've put on this system before.

To further that, I also tried it on my Mac (which uses an operating system based on BSD, another Unix-like system) which also has a DVD-RW drive. Again, I've never had a problem reading ANY disc (regardless if it was for PC, Linux, or Mac). Yet this disc thinks it's blank when I load it."

Do you know if the duplicate disk you have is readable/usable?

I'll look forward to more information about receiving this portion of the data for audit. If you think that we would benefit by turning this issue over to our tech contacts, I can see about arranging another call.

Cc: Kelly Scott; jleee@JonesDay.com
Subject: RE: Messengering Data

Ms. McCloskey,

I presented ICANN with the disk for review, as they do have linux-based machines. ICANN has attempted to mount the disk on multiple machines with no luck; the disk is unreadable. In attempting to test the disk, they used a separate disk as a baseline to confirm that the disk drives were in proper working order, and the baseline disk worked in every case. Did your office test the disk before it was presented to ICANN? If ICANN were to present at your offices as invited to review the disk, would your office have a linux machine for us to view the data on, or would ICANN have had to have brought their own?

Can you please arrange to have a working copy of the data submitted to me today? I can arrange a courier service if necessary.

At this time, given the inoperability of the disk, ICANN cannot certify that RegisterFly has complied with any portion of its obligations as imposed by Paragraph 8 of the Permanent Injunction.

Dear Ms. McCloskey -

I just received the envelope containing a single disk entitled "RegFly escrow files (2)" Based on your email below, I was expecting at least 2 DVDs.

I then attempted to test the disk prior to forwarding to ICANN. I am unable to open the contents of the disk. Both on my computer and on a second computer, the DVD drive does not recognize the disk, and does not list any files on it.

Please: 1. confirm that I was only to receive a single disk; and 2. let me know how I can obtain a working copy of the disk(s) containing the registration data as soon as possible. If necessary, I can provide you with an address for delivery this weekend.

Thank you for your immediate attention to this -

 Subject Re: FW: SendThisFile File Notification

Ms. McCloskey,

We are able to access this link, but prior to our downloading this file - which is quite large and will take a long time - could you please confirm what this is? The file name that appears (regfly_escrow_may30.zip) seems to be a duplicate of the data that ICANN has already received from your client. Is this a different file? If this is the same file, (and setting aside any issues relating to financials) this does not in any way meet RegisterFly's audit obligations under Section 3.4.3 of the Registrar Accreditation Agreement.

Re: Termination of Registrar Accreditation Agreement

Dear Mr. Medina:

Pursuant to Paragraph 14 of the April 26, 2007 Preliminary Injunction (approved as a Permanent Injunction on May 25, 2007) and Section 5.3 of the Registrar Accreditation Agreement, ICANN hereby terminates RegisterFly.Com, Inc.'s Registrar Accreditation Agreement. As of today, June 1, 2007, RegisterFly.Com, Inc. may no longer operate as an ICANN-accredited registrar.

I am enclosing the Order Imposing Further Civil Sanctions, as entered by the Court on May 31, 2007, which attaches a copy of the Preliminary Injunction. The Injunction imposes additional obligations on RegisterFly in the event that ICANN exercises its right to immediate termination. These additional obligations are now in effect, and ICANN will record for the Court any failure to comply with any portion of the Injunction.

Very truly yours,

Jeffrey A. LeVeve
Counsel for ICANN

EXHIBIT J
PAGE 28

Uniform Domain Name Dispute Resolution Policy

Uniform Domain Name Dispute Resolution Policy

1. Purpose. This Uniform Domain Name Dispute Resolution Policy (the "Policy") is incorporated by reference into your Registration Agreement, and sets forth the terms and conditions in connection with a dispute between you and any party other than us (the registrar) over the registration and use of an Internet domain name registered by you. Proceedings under Paragraph 4 of this Policy will be conducted according to the Rules for Uniform Domain Name Dispute Resolution Policy (the "Rules of Procedure"), and the selected administrative-dispute-resolution service provider's supplemental rules.

2. Your Representations. By applying to register a domain name, or by asking us to maintain or renew a domain name registration, you hereby represent and warrant to us that (a) the statements that you made in your Registration Agreement are complete and accurate; (b) to your knowledge, the registration of the domain name will not infringe upon or otherwise violate the rights of any third party; (c) you are not registering the domain name for an unlawful purpose; and (d) you will not knowingly use the domain name in violation of any applicable laws or regulations. It is your responsibility to determine whether your domain name registration infringes or violates someone else's rights.

3. Cancellations, Transfers, and Changes. We will cancel, transfer or otherwise make changes to domain name registrations under the following circumstances:

- a. subject to the provisions of Paragraph 8, our receipt of written or appropriate electronic instructions from you or your authorized agent to take such action;
- b. our receipt of an order from a court or arbitral tribunal, in each case of competent jurisdiction, requiring such action; and/or
- c. our receipt of a decision of an Administrative Panel requiring such action in any administrative proceeding to which you were a party and which was conducted under this Policy. (See Paragraph 4(i) and (k) below.)

We may also cancel, transfer or otherwise make changes to a domain name registration in accordance with the terms of your Registration Agreement or other legal requirements.

4. Mandatory Administrative Proceeding.

This Paragraph sets forth the type of disputes for which you are required to submit to a mandatory administrative proceeding. These proceedings will be conducted before one of the administrative-dispute-resolution service providers.

- a. Applicable Disputes. You are required to submit to a mandatory administrative proceeding in the event that a third party (a "complainant") asserts to the applicable Provider, in compliance with the Rules of Procedure, that
 - (i) your domain name is identical or confusingly similar to a trademark or service mark in which the complainant has rights; and
 - (ii) you have no rights or legitimate interests in respect of the domain name; and
 - (iii) your domain name has been registered and is being used in bad faith.

In the administrative proceeding, the complainant must prove that each of these three elements are present.

b. Evidence of Registration and Use in Bad Faith. For the purposes of Paragraph 4(a)(iii), the following circumstances, in particular but without limitation, if found by the Panel to be present, shall be evidence of the registration and use of a domain name in bad faith:

- (i) circumstances indicating that you have registered or you have acquired the domain name primarily for the purpose of selling, renting, or otherwise transferring the domain name registration to the complainant who is the owner of the trademark or service mark or to a competitor of that complainant, for valuable consideration in excess of your documented out-of-pocket costs directly related to the domain name; or
- (ii) you have registered the domain name in order to prevent the owner of the trademark or service mark from reflecting the mark in a corresponding domain name, provided that you have engaged in a pattern of such conduct; or

EXHIBIT K
PAGE 079

(iii) you have registered the domain name primarily for the purpose of disrupting the business of a competitor; or

(iv) by using the domain name, you have intentionally attempted to attract, for commercial gain, Internet users to your web site or other on-line location, by creating a likelihood of confusion with the complainant's mark as to the source, sponsorship, affiliation, or endorsement of your web site or location or of a product or service on your web site or location.

c. How to Demonstrate Your Rights to and Legitimate Interests in the Domain Name in Responding to a Complaint. When you receive a complaint, you should refer to Paragraph 5 of the Rules of Procedure in determining how your response should be prepared. Any of the following circumstances, in particular but without limitation, if found by the Panel to be proved based on its evaluation of all evidence presented, shall demonstrate your rights or legitimate interests to the domain name for purposes of Paragraph 4(a)(ii):

(i) before any notice to you of the dispute, your use of, or demonstrable preparations to use, the domain name or a name corresponding to the domain name in connection with a bona fide offering of goods or services; or

(ii) you (as an individual, business, or other organization) have been commonly known by the domain name, even if you have acquired no trademark or service mark rights; or

(iii) you are making a legitimate noncommercial or fair use of the domain name, without intent for commercial gain to misleadingly divert consumers or to tarnish the trademark or service mark at issue.

d. Selection of Provider. The complainant shall select the Provider by submitting the complaint to that Provider. The selected Provider will administer the proceeding, except in cases of consolidation as described in Paragraph 4(f).

e. Initiation of Proceeding and Process and Appointment of Administrative Panel. The Rules of Procedure state the process for initiating and conducting a proceeding and for appointing the panel that will decide the dispute (the "Administrative Panel").

f. Consolidation. In the event of multiple disputes between you and a complainant, either you or the complainant may petition to consolidate the disputes before a single Administrative Panel. This petition shall be made to the first Administrative Panel appointed to hear a pending dispute between the parties. This Administrative Panel may consolidate before it any or all such disputes in its sole discretion, provided that the disputes being consolidated are governed by this Policy or a later version of this Policy.

g. Fees. All fees charged by a Provider in connection with any dispute before an Administrative Panel pursuant to this Policy shall be paid by the complainant, except in cases where you elect to expand the Administrative Panel from one to three panelists as provided in Paragraph 5(b)(iv) of the Rules of Procedure, in which case all fees will be split evenly by you and the complainant.

h. Our Involvement in Administrative Proceedings. We do not, and will not, participate in the administration or conduct of any proceeding before an Administrative Panel. In addition, we will not be liable as a result of any decisions rendered by the Administrative Panel.

i. Remedies. The remedies available to a complainant pursuant to any proceeding before an Administrative Panel shall be limited to requiring the cancellation of your domain name or the transfer of your domain name registration to the complainant.

j. Notification and Publication. The Provider shall notify us of any decision made by an Administrative Panel with respect to a domain name you have registered with us. All decisions under this Policy will be published in full over the Internet, except when an Administrative Panel determines in an exceptional case to redact portions of its decision.

k. Availability of Court Proceedings. The mandatory administrative proceeding requirements set forth in Paragraph 4 shall not prevent either you or the complainant from submitting the dispute to a court of competent jurisdiction for independent resolution before such mandatory administrative proceeding is commenced or after such proceeding is concluded. If an Administrative Panel decides that your domain name registration should be canceled or transferred, we will wait ten (10) business days (as observed in the location of our principal office) after we are informed by the applicable Provider of the Administrative Panel's decision before implementing that decision. We will then implement the decision unless we have received from you during that ten (10) business day period official documentation (such as a copy of a complaint, file-stamped by the clerk of the court) that you have commenced a lawsuit against the complainant in a jurisdiction to which the complainant has submitted under Paragraph 3(b)(xiii) of the Rules of Procedure. (In general, that jurisdiction is either the location of our principal office or of your address as shown in our Whois database. See Paragraphs 1 and 3(b)(xiii) of the Rules of Procedure for details.) If we receive such documentation within the ten (10) business day period, we will not implement the Administrative Panel's decision, and we will take no further action, until we receive (i) evidence satisfactory to us of a resolution between the parties; (ii) evidence satisfactory to us that your lawsuit has been dismissed or withdrawn;

EXHIBIT

PAGE 30

or (iii) a copy of an order from such court dismissing your lawsuit or ordering that you do not have the right to continue to use your domain name.

5. All Other Disputes and Litigation. All other disputes between you and any party other than us regarding your domain name registration that are not brought pursuant to the mandatory administrative proceeding provisions of Paragraph 4 shall be resolved between you and such other party through any court, arbitration or other proceeding that may be available.

6. Our Involvement in Disputes. We will not participate in any way in any dispute between you and any party other than us regarding the registration and use of your domain name. You shall not name us as a party or otherwise include us in any such proceeding. In the event that we are named as a party in any such proceeding, we reserve the right to raise any and all defenses deemed appropriate, and to take any other action necessary to defend ourselves.

7. Maintaining the Status Quo. We will not cancel, transfer, activate, deactivate, or otherwise change the status of any domain name registration under this Policy except as provided in Paragraph 3 above.

8. Transfers During a Dispute.

a. Transfers of a Domain Name to a New Holder. You may not transfer your domain name registration to another holder (i) during a pending administrative proceeding brought pursuant to Paragraph 4 or for a period of fifteen (15) business days (as observed in the location of our principal place of business) after such proceeding is concluded; or (ii) during a pending court proceeding or arbitration commenced regarding your domain name unless the party to whom the domain name registration is being transferred agrees, in writing, to be bound by the decision of the court or arbitrator. We reserve the right to cancel any transfer of a domain name registration to another holder that is made in violation of this subparagraph.

b. Changing Registrars. You may not transfer your domain name registration to another registrar during a pending administrative proceeding brought pursuant to Paragraph 4 or for a period of fifteen (15) business days (as observed in the location of our principal place of business) after such proceeding is concluded. You may transfer administration of your domain name registration to another registrar during a pending court action or arbitration, provided that the domain name you have registered with us shall continue to be subject to the proceedings commenced against you in accordance with the terms of this Policy. In the event that you transfer a domain name registration to us during the pendency of a court action or arbitration, such dispute shall remain subject to the domain name dispute policy of the registrar from which the domain name registration was transferred.

9. Policy Modifications. We reserve the right to modify this Policy at any time. We will post our revised Policy at <URL> at least thirty (30) calendar days before it becomes effective. Unless this Policy has already been invoked by the submission of a complaint to a Provider, in which event the version of the Policy in effect at the time it was invoked will apply to you until the dispute is over, all such changes will be binding upon you with respect to any domain name registration dispute, whether the dispute arose before, on or after the effective date of our change. In the event that you object to a change in this Policy, your sole remedy is to cancel your domain name registration with us, provided that you will not be entitled to a refund of any fees you paid to us. The revised Policy will apply to you until you cancel your domain name registration.

Join the ResellerFly.com Reseller program

RegisterFly.com is one of the top domain Registrars in the world in terms of domains registered and new growth. For a limited time, we are giving away free \$6.50 registration accounts. You do not need to pay an annual membership fee or pre-fund your account with an absurd amount of money to qualify (as much as \$7000.00 with some companies). What you get is very inexpensive domain name registration pricing that beats the bulk pricing of most registrars.

What do you get?

We provide you with an XML based API

If you can program in PHP, PERL, ASP you can integrate the XML api in a few hours

You can check, register, delete, update contact information, change DNS via the API

Coupon code pricing can be passed down to your clients via the API

Affordable, you prefund your account with only enough to cover the cost of registration of the names.

pricing applies to .com, .net, .org, .us, .biz and .name extensions

Domain deletions allow within 4 day cycle

Share in 50% of all Expired PPC and Expired Auction revenue on names registered through your reseller account!

How does this work with my existing RegisterFly account?

The special price ONLY applies to names registered via the API

Your normal account pricing applies to names registered through the RegisterFly interface

You can manage the names via the API or via the RegisterFly site, however they must be registered via the API to get the special pricing

You can only manage names registered via the API. Names not under RegisterFly the registrar will not be able to be managed

What must I provide on my end?

Basic programming skills

if you are integrating on your site you must provide your own merchant account or payment gateway

You handle the sales and customer service of names you register

Over 22000 resellers have joined our reseller program

Company Information

RegisterFly.com provides industry leading 24/7 Support via a variety of methods which includes, phone, email, ticket system. RegisterFly.com offers domain registrations as low as \$2.99/ea and domain transfers for only \$6.99. By adhering to our basic principals of low cost and value to our customers and excellent customer service we have grown to be one of the largest low cost registrars on the web today. In terms of number of customers and domains registered we are one of the 10th largest registrars in the world. We are not a "one man" shop (like many domain registrars and resellers) or a "here today gone tomorrow" business, we have invested substantially in positioning Registerfly.com as a global industry leader.

Quick Fact

- Founded in 2001
100% Debt Free
Customers in 212 Countries
1,000,000+ paid
300,000+ site
Flyservers.com
Over 2 million

How can you sell domains for so little?

Our business model is based on high volume, low prices and keeping our overhead low. We do not believe in spending millions of dollars on ineffective advertising or being lavish. We have built a profitable, thriving business and owe it all to our customers. Our approach is to keep our eye on the bottom line while continuing to develop and offer new products and services to our customers, in other words, value for our customers.

Sure there are other registrars out there cheaper. Some actually are willing to make pennies over cost or worst yet lose money on each domain sold just for the sake of market share, NOT RegisterFly. We are in this business for the long haul.

TRANSFER YOUR DOMAIN
\$6.99/YEAR

Domain Name Transfers

Tired of registrars with poor service or ones who lure you with cheap prices only to discover the "cheap" price really is not that cheap? Does your current registrar offer 24/7 phone support? Is your current registrar a "virtual company" running their business out of their home? Is managing your domains or purchasing new ones becoming cumbersome? Moving to RegisterFly cannot get any easier. In as little as a day you can transfer your domain name and start enjoying the benefits of RegisterFly.com

Step 1: Enter up to 250 domain names below

Enter each domain name on one line
Examples:
 mydomains.com
 mydomains2.com

Important Notes:
 Domains cannot be transferred until they have been registered with your current Registrar for at least 60 days.

In order to transfer a .INFO, .BIZ, .ORG, .US, .name domain, you will need to obtain an authorization code from the current registrar. If you are an existing client and you wish to view your transfer status please [click here](#).

Bulk Transfers:
 We now support faxed based transfers if you are transferring large batches of names you can avoid individually approving each one

Advantages

- Extra Year added for FREE
- NO RISK - You only pay upon success
- Automated domain transfer process
- Free Privacy Protection
- Seamless Transfer
- Bulk Management Tools
- Powerful security tools
- Lowest bulk pricing
- One of the fastest growing registrars in the world
